

SAFE GLOBAL SERVICES

Support Capabilities

Safe Global Services (SGS) specializes in cross-border security for companies conducting business in Mexico. SGS's clients consist of United States and foreign companies which operate production plants, oil and gas platforms, transportation companies, heavy equipment manufacturing, warehouses, and retail outlets.

SGS is composed of highly trained and experienced personnel who are former United States and Mexican law enforcement agents. Based in McAllen, Texas, SGS personnel have more than ten years of experience in using intelligence and counterintelligence methods to successfully resolve complex bi-national investigations. SGS personnel possess the knowledge, skills and ability to provide their clients with 360° protection of their businesses.

SGS understands the nuances of how organized criminal groups operate in the area, their structure, and their mindset. Since 2008, SGS has cultivated numerous intelligence sources throughout many segments of the community whose information and assistance has resulted in the detection and prevention of loss of life, the safe return of victims, and the identification of those responsible for violent criminal activity affecting economic interests. SGS sources are recruited from within the different political, law enforcement and social stratum as well as from sources that have inside knowledge of the Drug Cartel's structure. SGS sources have a proven record of reliability, capability, and stability.

SGS, using their professional and personal contacts throughout law enforcement in the United States and Mexico, can send first responders in the event of an emergency or hostile event to ensure their client's protection and extraction.

SGS can provide life safety, survival, and intervention technique courses to executives, their family, employees and to law enforcement personnel. These courses describe methods of avoiding being taken hostage and survival techniques in the event of becoming a victim. Also taught are tactical and psychological law enforcement maneuvers used to resolve situations as well as tactics used by the criminal element to thwart law enforcement.

SGS can provide their clients with detailed and up-to-date intelligence regarding regional threats and hostilities. Using our vast network of intelligence sources in the United States and in

2018

Mexico, SGS can consult with their clients on how to mitigate the vulnerability of doing business in the region.

SGS has prepared numerous Threat and Vulnerability Security Assessments tailored to the individual needs of each company.

Currently Retained Capabilities

EXECUTIVE PROTECTION: SGS can provide armed and unarmed security guards. SGS provides local, national, and international transportation services for executives. Using our ground transportation fleet, SGS can ensure our VIPs comfort and security while traveling to and from facility, hotel, town, etc. SGS can provide transportation services day or night so our VIPs can conduct business both in the United States and Mexico.

KIDNAPPING: Using advanced GPS technology; SGS can continually monitor the exact location of our clients, their family members, or business assets. And, in the event of an emergency or hostile event against them, SGS's clients can notify our 24-hour operations center via an application in their cellular telephones (androids) which transmits their exact location and need for assistance. In the event of a kidnapping, SGS will coordinate with and assist local law enforcement as permitted. In addition, SGS will deploy its own resources and assets and conduct its own investigation, independently from law enforcement, and attempt to negotiate the quick and safe recovery of its clients.

EXTORTION: Using their network of intelligence sources and access to a myriad of databases, SGS can conduct due diligence investigations on individuals in the United States and in Mexico to ensure their clients take reasonable care from being associated with the criminal element. SGS can assist executives in protecting themselves and their company from criminal or civil liability in their business associations.

PROTECTION OF PROPERTY AND FACILITY INTRUSION: Whether at the home or office, SGS can provide 24-hour armed or unarmed security personnel to provide the ultimate protection from intrusion or unwanted surveillance and to reduce the risk of personal violence against SGS's clients. Our guards are skilled in surveillance detection and counter surveillance measures. SGS can install video monitoring equipment around the perimeter of the terminal. These discreet devices, which can be monitored remotely by the client and/or at SGS, can help protect and detect unwanted intrusions.

2018

THEFT: SGS can conduct investigations into corporate internal theft, fraud, or malfeasance to assist executives in determining culpability and developing more effective internal controls.

REAL TIME INFORMATION/ALERTS: SGS, using our highly efficient network of intelligence and counterintelligence sources, provides our clients with a unique SGS Alert® system which immediately notifies our clients via text message or email of any disturbance or hostile event which could affect their travel or the movement of their assets in Mexico. Using this system allows executives to reroute their personnel or products to mitigate the vulnerabilities inherent in this region.

GOVERNMENT PERMITTING: Through established contacts, SGS can assist in obtaining any permitting and licensing necessary to operate a facility.

GPS Tracking Capabilities

In addition to tracking cellular telephones, SGS utilizes sophisticated tracking devices on all of their vehicles which are equipped with discrete panic buttons in the event of an emergency. All vehicles are tracked from SGS's Command Center in McAllen, Texas. In the event of an emergency, SGS has law enforcement and emergency services assets throughout Mexico who will immediately respond to the scene and provide assistance in defusing any threats, rescue any injured, and extract victims. SGS has a proven record of cross-border operations and maintains an acute awareness of the threats and vulnerabilities that could negatively impact their clients. SGS has over 300 employees in McAllen, Texas and throughout Mexico. SGS's Command Center monitors hundreds of GPS trackers 24/7 and 365 days a year.

For further information on our list of services please contact our 24/7 operations center at 956-668-7233 (SAFE) or visit our website at safeglobalservices.com.
